ABOUT ME

Software Engineer with **10+ years of experience** specialized in scalable backend development. Expert in **Java** with solid expertise in **Python** and **JavaScript/TypeScript**. Proven track record of delivering high-impact solutions in large-scale corporate environments, with focus on microservices architecture, RESTful APIs, and performance optimization. Brazilian Jiu-Jitsu practitioner, applying principles of discipline and continuous improvement to software development. Passionate about exploring new technologies and solving complex problems through well-designed architectures.

PROFESSIONAL EXPERIENCE

Software Engineer | Claro

May/2024 – Present

São Paulo, SP

Developing streaming platform for Claro TV with focus on scalability and performance

- ▶ Architected and implemented **BFF (Backend for Frontend)** using Node.js/TypeScript/Express, optimizing communication between 15+ microservices and reducing latency by 30%
- ▶ Led integration of Python/Django APIs and microservices, ensuring seamless streaming experience for millions of users
- ▶ Implemented caching strategies and optimization that reduced API response time by 40%
- ▶ Established automated testing pipeline increasing code coverage from 45% to 85%

Stack: Node.js, TypeScript, Express, Python, Django, Microservices, RESTful APIs, DevOps

Software Architect / Tech Lead | Lello Condomínios

Nov/2018 – May/2024

São Paulo, SP

Led technological transformation from legacy systems to modern microservices architecture

- ▶ Commanded Innovation squad in transforming monolithic systems into **white label platform**, enabling commercial expansion to 50+ new partners

- ▶ Defined architectural and technological standards that reduced time-to-market for new features by 60%
- ▶ Mentored team of 8 developers, promoting clean code culture and agile practices
- ▶ Modernized legacy systems (Java 6, EJB, JSF, PHP) migrating to Java 18 with modern architecture
- ▶ Reduced technical debt by 70% through strategic refactoring and technical documentation

Stack: Java 18, Microservices, JWT, JPA/Hibernate, Oracle 12, MariaDB, Git, RESTful APIs

Software Engineer | Loggi

May/2021 – Aug/2022

São Paulo, SP

Developed high-impact solutions to optimize logistics operations at national scale

- ▶ Designed and implemented Python/Django APIs that optimized critical logistics processes, improving operational efficiency by 25%
- ▶ Optimized gRPC connections reducing TLS negotiation overhead, resulting in 35% performance improvement
- ▶ Contributed to development of Python monorepo with Protocol Buffers compilation automation, reducing build time by 40%
- ▶ Implemented reusable internal libraries that accelerated development of 10+ Django projects

Stack: Python, Django, gRPC, Protocol Buffers, RESTful APIs, Monorepo, Microservices

Full Stack Developer | Electric Energy Trading Chamber (CCEE)

Sep/2019 – May/2021

São Paulo, SP • via Ewave do Brasil

Developed critical solutions for electric energy sector with high processing demands

- ▶ **Revolutionized report generation system:** increased capacity from 50,000 to 300,000 reports/day (500% increase)
- ▶ Implemented parallel architecture with vertical scalability and messaging (Artemis), eliminating processing bottlenecks
- ▶ Developed automatic reprocessing system with zero manual intervention

Stack: Java, Spring (MVC, Security, Batch), Angular, TypeScript, Oracle, MariaDB, Artemis, Rancher, OpenShift

EDUCATION

- Specialization in Artificial Intelligence**

USP - University of São Paulo | 2020 - 2022
- Bachelor's Degree in Computer Science**

UNIFOR - University of Fortaleza | 2012 - 2017
- Teaching Degree in Computer Science**

UECE - State University of Ceará | 2012 - 2016

TECHNICAL SKILLS

- Languages & Frameworks**

Expert: Java, Python, Spring Framework
Advanced: JavaScript, TypeScript, Node.js, Express, Django
Intermediate: Angular, React
- Architecture & Patterns**

Microservices, RESTful APIs, Design Patterns, SOLID, Clean Architecture, Domain-Driven Design (DDD), Backend for Frontend (BFF)
- Databases**

Oracle, MariaDB, MySQL, PostgreSQL, JPA/Hibernate
- DevOps & Tools**

Docker, Kubernetes, Rancher, OpenShift, Git, CI/CD (Bamboo), Messaging (Artemis, RabbitMQ), gRPC, Protocol Buffers, JWT, OAuth

SOFT SKILLS

- Technical Leadership**

Experience leading squads and mentoring developers
- Effective Communication**

Translating business requirements into technical solutions
- Problem Solving**

Analytical approach to complex challenges
- Teamwork**

Collaboration with multidisciplinary teams

Adaptability

Quick adaptation to new technologies

Ownership Mindset

End-to-end responsibility for projects

LANGUAGES

Portuguese: Native

English: Intermediate

CERTIFICATIONS

Advanced JavaScript I: ES6, OOP and Design Patterns

Lean Startup: First Steps of Your Lean Startup

Regular Expressions: Capturing Text Magically
